

Fools Rush In

**It's gonna be different now everything's gone
I was shut down but now I'm switched on
Can't believe all the grief that I held so deep down inside for so long**

**Back in the saddle again back in the game
A little bit rusty but some things never change
New shoes Dutch courage and wink
Is all that I need to set me straight
But beware of the path you take**

**How will you feel in the morning?
How will know that this is real
How will you feel in the morning?
Take your time
Only fools rush in**

Fools Rush In

**My friend tells me I've got nothing left to lose
Can't help thinking I've got something to prove
He gets around all the town and I sound like a fool because I tell him
I don't approve**

**That's not to say that I want to go to waste
A chance in a lifetime cannot be replaced
I don't know where to go even though I have searched high and low
just to find that place
That we will come face to face my love**

**All my life I've been waiting for the time
When it feels like I'm doing it right
All the planets and stars will align
And you'd be mine
But in the meantime**
